

美澳區銀獎

德州農工大學-羅o欣-溫室一景

這張照片呈現的是我們實驗室的專屬溫室，看起來可能平凡無奇，然而卻是我在美國每一天做實驗的地方。這間溫室天氣好時，隨著照射進來的陽光，非常漂亮，也就是這張照片上的景象。架子上的草皮，為我的好夥伴，也是實驗重要的材料之一。草皮並非原本就乖乖長在盆栽中，每一張草皮都是我自己切割進盆栽並細心呵護的。每天走進溫室心情就特別好，無疑是我最懷念的地方。

The picture demonstrated the greenhouse of the Dr. Sword's lab. This is not only the place we put the grass, it's also like my office every day. With the sunshine, I can see the airplane on the blue sky, sometimes it will have the helicopter. The grass you can see on the metal plate is my material for doing the experiment. Originally, the grass was overlap together piece by piece, I spend almost 3 days to cut them with the fitting size and put them into the pots with fertilizer in. Though the campus in TAMU was also big and beautiful, the view in this greenhouse is still my favorite during these three months.
