

The Wonders of My School Life at NCHU (By Wonder N. Dlamini, NCHU)

Brief Introduction

My name is Wonder Nathi Dlamini from Eswatini, a country lying between Mozambique and South Africa in the lower parts of Southern Africa. I arrived in National Chung Hsing University (NCHU), Taichung, Taiwan on the 21ST September 2016 to pursue my undergraduate studies in International Bachelor Program of Agribusiness (IBPA). Upon completion of course work I qualified for early graduation as a result on June 2019 NCHU conferred me with the degree of Bachelor of Science in Agribusiness, and a minor degree in Soil and Environmental Sciences. Later August 2019 I started my graduate studies in Soil and Environmental Sciences at NCHU. Below I will share some of my experiences in NCHU including why I picked NCHU over other universities and colleges.

Why I Picked NCHU

I researched about the countries in the world, Taiwan came up to be the best for high quality life with great operational life, affordability and easy access to things such as healthcare, food and internet. Furthermore, Taiwan is friendly and very safe. After identifying the best country, I searched for cities that have my desired traits. Taichung city came up to be the most livable city in Taiwan with convenient and very easy transportation system. It is an open secret in Asia and the entire world that Taichung has the best weather in Taiwan. Next I had to make a big decision about which University to choose, and NCHU came up to be the very best University in Taichung and in fact one of the best Universities in the world. Among other things I chose NCHU because of the wonderful interdisciplinary offered. I used other appropriate factors, such as career opportunities, financial possibilities, application requirements, location, reputation and I put many more other things into consideration remarkably NCHU still came up to be the finest University in Taichung city. While going over the internet digging more about NCHU I was inspired with the international activities in NCHU. The mix and high number of International students in NCHU created a rich campus community. Before applying in NCHU I made friends online with Taiwanese and International students in NCHU astonishingly all of them said great things about NCHU. Then I realized NCHU is indeed a place to Call Home. A place to enhance my employment opportunities and later contribute to the development of the world.

Kindness

I haven't met people as unfailingly as wonderful, supportive, good hearted, absolute thoughtful, generous and pleasing as Taiwanese and the foreigners in NCHU. The students, lecturers, workforce and all and sundry are magnificent people in NCHU. During my arrival about 3:00pm at Taoyuan International Airport in Taipei I was welcomed by two soft hearted NCHU OIA representatives who took me to the dormitory. My study in NCHU has been possible through NCHU scholarship and in fact there are a number of scholarships provided here. With the help of NCHU and friends I was able to settle down. It is my third year now in Taiwan and yet I still feel coming to NCHU was the best decision I ever made in my life. Taiwanese people are really soft hearted since I am still experiencing their kindness even to date. Among other things I have been able to make a lot of wonderful international friends even though most of them left already to their different countries they still remain good helpful friends.

Learning Structure

The learning structure in NCHU is one of the best. Things are clearly explained in the school system. The school website has information and answers to questions students might have. Information about courses is clearly explained in NCHU course selection system. The lecturers, students and staff members have been very helpful during my study in NCHU. NCHU has the best professors because they have top best qualities of effective educators. They are dedicated to teaching, patient, caring and kind hearted. In fact, they develop good relationships with their students. In order to create a positive and productive environment they actively engage students in learning. There were a number of life changing educational trips organized by NCHU OIA, my two departments Agribusiness and, soil and Environmental Sciences. NCHU actively updates students about current activities and bring lot of opportunities to students as a result through one update from NCHU OIA I got a job to work for Taichung City government in Taiwan where I conducted telephonic interviews with international organizations. I also got a chance to work for many corporations while in NCHU. NCHU brings lot of different companies to share about their employment opportunities on campus. Hence it is very easy to get employment after and during your study in NCHU.

Wonders of NCHU

While studying in NCHU it is convenient to go anywhere because of the transport system. Accommodation is cheap and affordable. Restaurants are nearby the university and some are on campus. They offer different kind of delicious food at reasonable prices. There are more than hundred student clubs and societies. The clubs connect to community service, sports, social science studies, art, music, literature, humanities, philosophy, religion, and language learning. During my free time I would go to the gym and swimming pool just to refresh my mind and maintain a healthy life. NCHU has given me wealthy of experience by developing my skills in a very big way. NCHU gave me an opportunity to discover new things.

I developed new strength and abilities. Now I have a new view of the World as I encountered different situations entirely unfamiliar during my study in NCHU. Now I have an informed mind as a result I have much less biased perspective. I am pleased to say I got a chance to learn to adapt and respond effective. towards other cultures and societies.
